

Science Fair Planning Sheet

Think of a question. What do you want to find out?	
Design an experiment. What will you measure/draw a diagram.	
Make sure your test is fair. What will stay the same?	
Decide on a variable which will change. What one thing will you change?	
Make a prediction. What do you think will happen?	
Carry out the experiment. Make sure it is a fair test and measure correctly. (Include photos)	
Write down measurements and observations. How will you present your findings (table, graph...)?	
Explain what happened. What did you find out? Was your prediction correct?	
Present you work on posters and bring everything to school on Wednesday 4 th January.
